

Summary

I am a self-motivated, detail-oriented, and reliable team player with excellent communication skills. I am committed to delivering high-quality work that meets or exceeds expectations and always strive to stay up-to-date with the latest industry trends and best practices.

Throughout my career, I have gained extensive experience in building and maintaining complex web applications. I am adept at designing and developing responsive, mobile-friendly, and user-centric web solutions, as well as ensuring high levels of security, scalability, and performance.

In addition to my technical skills, I have a solid understanding of front-end development technologies such as HTML, CSS, Bootstrap and jQuery. I am well-versed in Git version control and have experience collaborating with remote teams using platforms like GitHub and Bitbucket.

Furthermore, I have experience in cloud infrastructure management using AWS, including EC2, S3, RDS. I am proficient in deploying, monitoring, and scaling applications in the cloud.

Employee of the month

2013

Centric DMCC employee of the month for showing dedication and handling the load in pressure.

Tweet Olympics

2012

As the official mobile of the 2012 London Olympic Games, our challenge was to increase the awareness of Samsung Galaxy SIII during the games and engage users online. So we created the World's First TweetOlympics. Participants had to register with one of two teams (White/Blue) and out-tweet one another over 3 weekly rounds. All they had to do was tweet "Things They Could Do with Galaxy SIII" followed by their team's hash-tag (#TweetOlympicsWhite/#TweetOlympicsBlue). Campaign spread rapidly through Print, Blogs, Twitter and Facebook, leading many to micro/mobile site and igniting fierce competition – staying true to the spirit of the games.
